"We are the best at what we do"

Our products are made in state-of-the-art facilities and are of the best quality. You can rely on us for your construction material needs and we will ensure to fulfill them with our top-tier products. We adhere to Indian Standards and our goods go through a number of tests to make sure that the customers get the right product.

Discover the TOP TREE Plywood Plus difference today!

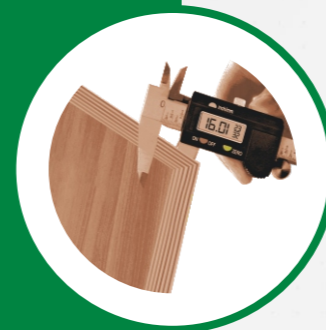

Visit our website or contact our friendly team to explore our extensive plywood range and experience unmatched quality, reliability, and customer service. Let us be your trusted partner in creating remarkable projects that stand the test of time.

Are you searching for the perfect plywood that combines quality, durability, and beauty? Look no further than TOP TREE Plywood Plus! We are your ultimate destination for all your plywood needs, offering a comprehensive range of top-of-the-line products that will exceed your expectations.

Here's what sets us apart:

PLUS Thickness

When it comes to projects that demand unmatched strength and durability, you need plywood that stands up to the challenge. That's where Full Thickness Plywood comes in. Our PLUS PLYWOOD allows for precise cutting, shaping, and joinery, making it a versatile choice for both professional builders and passionate DIY enthusiasts for the most demanding applications.

TOP TREE PLYWOOD PLUS is providing premium plywood solutions with full thickness in our full range of 6 MM. 9 MM. 12 MM. 16 MM and 19 MM.

PLUS Core & Density

Our Extra Core Plywood is specifically engineered to deliver enhanced strength and load-bearing capacity. By incorporating extra cores in ply wood construction, we ensure that our plywood can handle heavier loads, resist bending and warping, and provide superior structural integrity and stability, providing an ideal choice for flooring, cabinets, shelves, and other applications where consistent performance is crucial.

PLUS Resin

TOP TREE PLYWOOD PLUS has additional Resin-Infused glue lines offering unparalleled resilience, making it the perfect choice for applications exposed to moisture, humidity, and harsh environments. The increased resin content acts as a protective barrier, significantly improving the plywood's resistance to water damage, rot, decay, and fungal growth ensuring that your projects will stand the test of time, maintaining their beauty and functionality for years to come.

PLUS Quality

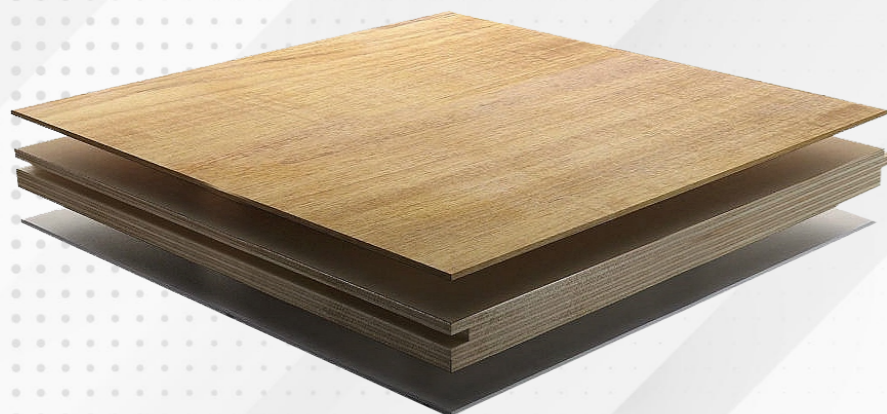

We understand the importance of quality materials for your projects. That's why we source only the finest, sustainably harvested high density timber to manufacture our plywood. With our cutting edge latest manufacturing technology, stringent quality control measures, you can trust that every sheet of plywood from TOP TREE Plywood Plus meets the highest standards, ensuring superior strength, stability, and longevity.

PLUS Variety

TOP TREE Plywood Plus has the perfect plywood for every application. From hardwood plywood to alternate, marine-grade to shuttering, we offer an extensive selection of plywood conforming to IS standards to suit your specific needs. Our diverse range of thicknesses, grades, and finishes ensures that you'll find the ideal plywood solution for any project, big or

- Available in IS 710 Marine Grade & IS 303 MR/BWR Grade
- All sizes & thickness available
- Specialty ply such as shuttering & fire retardant also available

Top TREE PRIME (IS : 710)

Marine Plywood is the outcome of a perfect amalgamation of excellent quality raw eucalyptus core veneer, advanced technology, and expertise of our diligent team. While manufacturing the Marine Grade Plywood, we make sure that all the stages such as gluing, cold pressing, hot pressing, sanding are carried out under the instructions of experts. The finished plywood is examined for ideal dimensions, visual imperfections and quality finish before stamping it with TOP TREE PRIME.

Applications

Marine plywood is used extensively as a building material in marine settings, such as on ships or at docks, as it performs well in humid conditions or anywhere it will receive prolonged exposure to moisture. It is also used in bathroom and kitchen walls and sub-flooring.

- Wood
- All Red Core
- All Thickness Available
- Also Available In BWR Grade (IS:303)

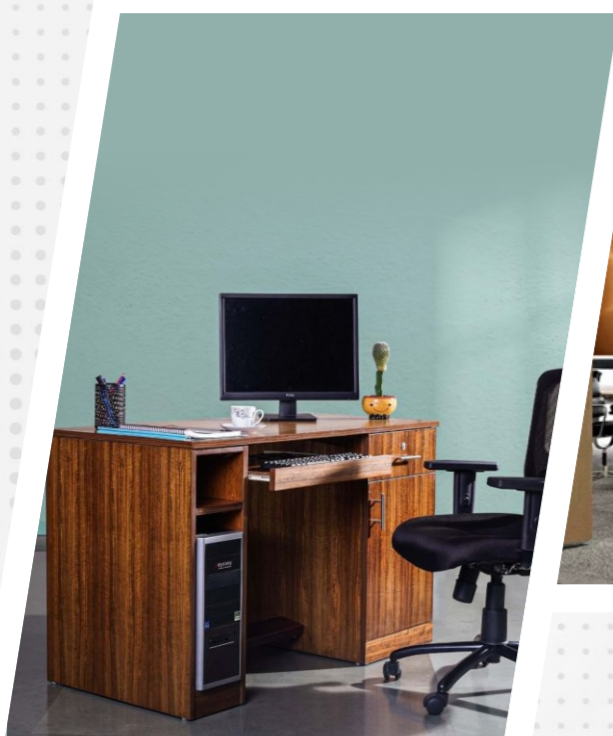

Top TREE CLUB (IS: 303)

Veneers from high-quality logs are mechanically dried and they undergo a stress relieving process, which are assembled in such a way to form a balanced construction. High quality fortified synthetic resins are used for gluing the veneers. The glue line is poisoned by special formulations of chemicals to make TOP TREE Plywood safe against borers. It is hot pressed under proper temperature and more. than 16 kg/cm² specific pressure. Conditioning is done after pressing followed by preservative treatment.

Applications

Partitions and paneling, ceilings in public rooms and corridors, floor underlayment, computers rooms, furniture, bus bodies, railway coaches, milk booths, sign boards, insert in panel doors, storage racks.

- Wood
- Alternate Core
- All Thickness Available
- Also Available in BWP Grade (IS:710)

TOP TREE® Block Board PLUS (IS: 1659)

Top Tree Block Board Plus is made from selected imported pine wood with rugged construction to withstand rough and continuous usage for long life. The virgin imported pine wood is fully seasoned and treated before crafting into board and thereafter pressed on both sides with core veneer and gurjan face veneer with MR/BWP grade resin.

- Available in 19MM, 22MM and 25 MM thickness
- BWP/MR grade available
- All sizes available

TOP TREE® Door Plus (IS: 2202)

Top Tree door has solid virgin pine wood battens and has pine frame on all sides and are pressed on both sides with core veneer and gurjan face veneer in specially made resin. The door quality is best in class and meets highest standards ensuring superior strength, stability and longevity.

- Virgin imported pine wood rail and stile
- Available in BWP/MR grade
- Available in all thickness and Sizes
